

Vacuum Solutions for Automotive Engineering

Introduction to Delfin complete range of industrial vacuum cleaners for grinder, saws and CNC machines

Aluminium Processing Machines

- ❑ Aluminum, carbon fiber and PVC cutters produce high quantities of dust when sawing frames.
- ❑ This dust is a risk both for the quality of the finished product and for the health of the operators, while it increases the costs of maintenance of the machines.

The solution

Extracting this dust and residues directly at the source is the best way of keeping the environment **clean, safe and efficient**.

Delfin has partnered up with some of the **leading manufacturers** of aluminum and PVC **cutting machines** in order to engineer the **best solutions** for this specific application.

Specific solutions

Delfin's extensive range of products offers many **different solutions** depending on the machines type (cutters with single, double or more saws, etc.) the material, **aluminum or PVC**, and the customer's requirements.

Our goal is to offer the **best technical solution** to our customer while **respecting** his **requirements** and **budget**.

The system

**Chips extraction system in
continuous duty**

Waste chips collected and stored
