

# TECNOIL EVOLUTION 2019-2020

Delfin holds dear customers' feedbacks and constantly aims at improving its products.

**The oil and chips range** has always been one of Delfin Best sellers, especially for its **sturdiness, efficiency and quality.**

## **RANGE BENEFITS**

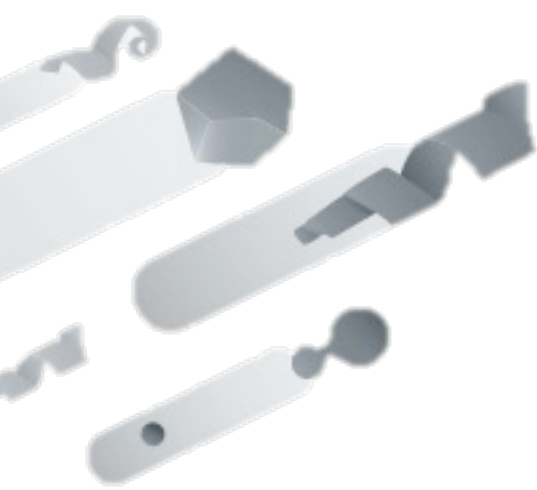

Quick and effective maintenance of machine tools

### **Financial savings**

- ✓ Oil recycling
- ✓ Cost reduction with regard to exhausted oil disposal

### **Time savings**

- ✓ The time spent on machine tools cleaning operations is reduced up to 60%
- ✓ Machine downtimes are reduced

## NEW FEATURES

**Submersible pump** with non-return valve

Discharge hose with Camlock connection

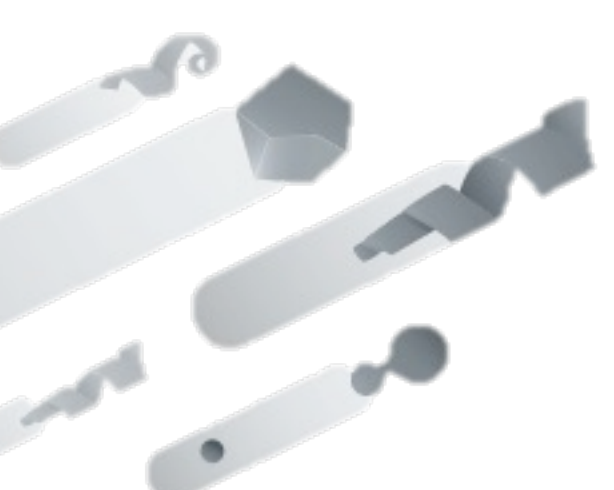

300 micron PPL filter as standard, placed inside the basket

Motor-head with 3 motors

No flux inversion

## ADVANTAGES / BENEFITS

- > Faster liquids discharge (140 lt/min)
- > Simultaneous suction and discharge
- > Aesthetic improvement and **better sealing**
- > Oil filtration up to **300 micron**
- > **Higher performances**

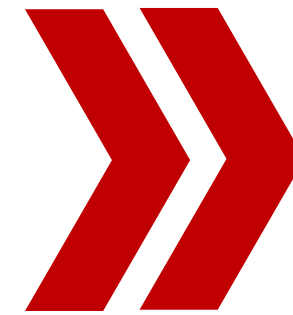

# TC220 MPI

**TC200 IF 3M**

**TC220 MPI**

## NEW FEATURES

Square tank with **220 liters capacity**

**Submersible pump** with non-return valve

300 micron PPL filter as standard, placed inside the basket

Motor-head with 3 motors

No flux inversion

Stainless steel inspection door in order to facilitate cleaning operations inside the tank

## ADVANTAGES / BENEFITS

- > +10% capacity compared to the previous version
- > Faster liquids discharge (140 lt/min)
- > Simultaneous suction and discharge
- > Oil filtration up to **300 micron**
- > **Higher performances**
- > **Easy access to the tank for cleaning operations**

**TC220 IF**

## NEW FEATURES

Square tank **220 liters capacity**

300 micron PPL filter as standard, placed inside the basket

Stainless steel inspection door in order to facilitate cleaning operations inside the tank

## ADVANTAGES / BENEFITS

- > +10% capacity compared to the previous version
- > Oil filtration up to **300 micron**
- > **Easy access to the tank for cleaning operations**

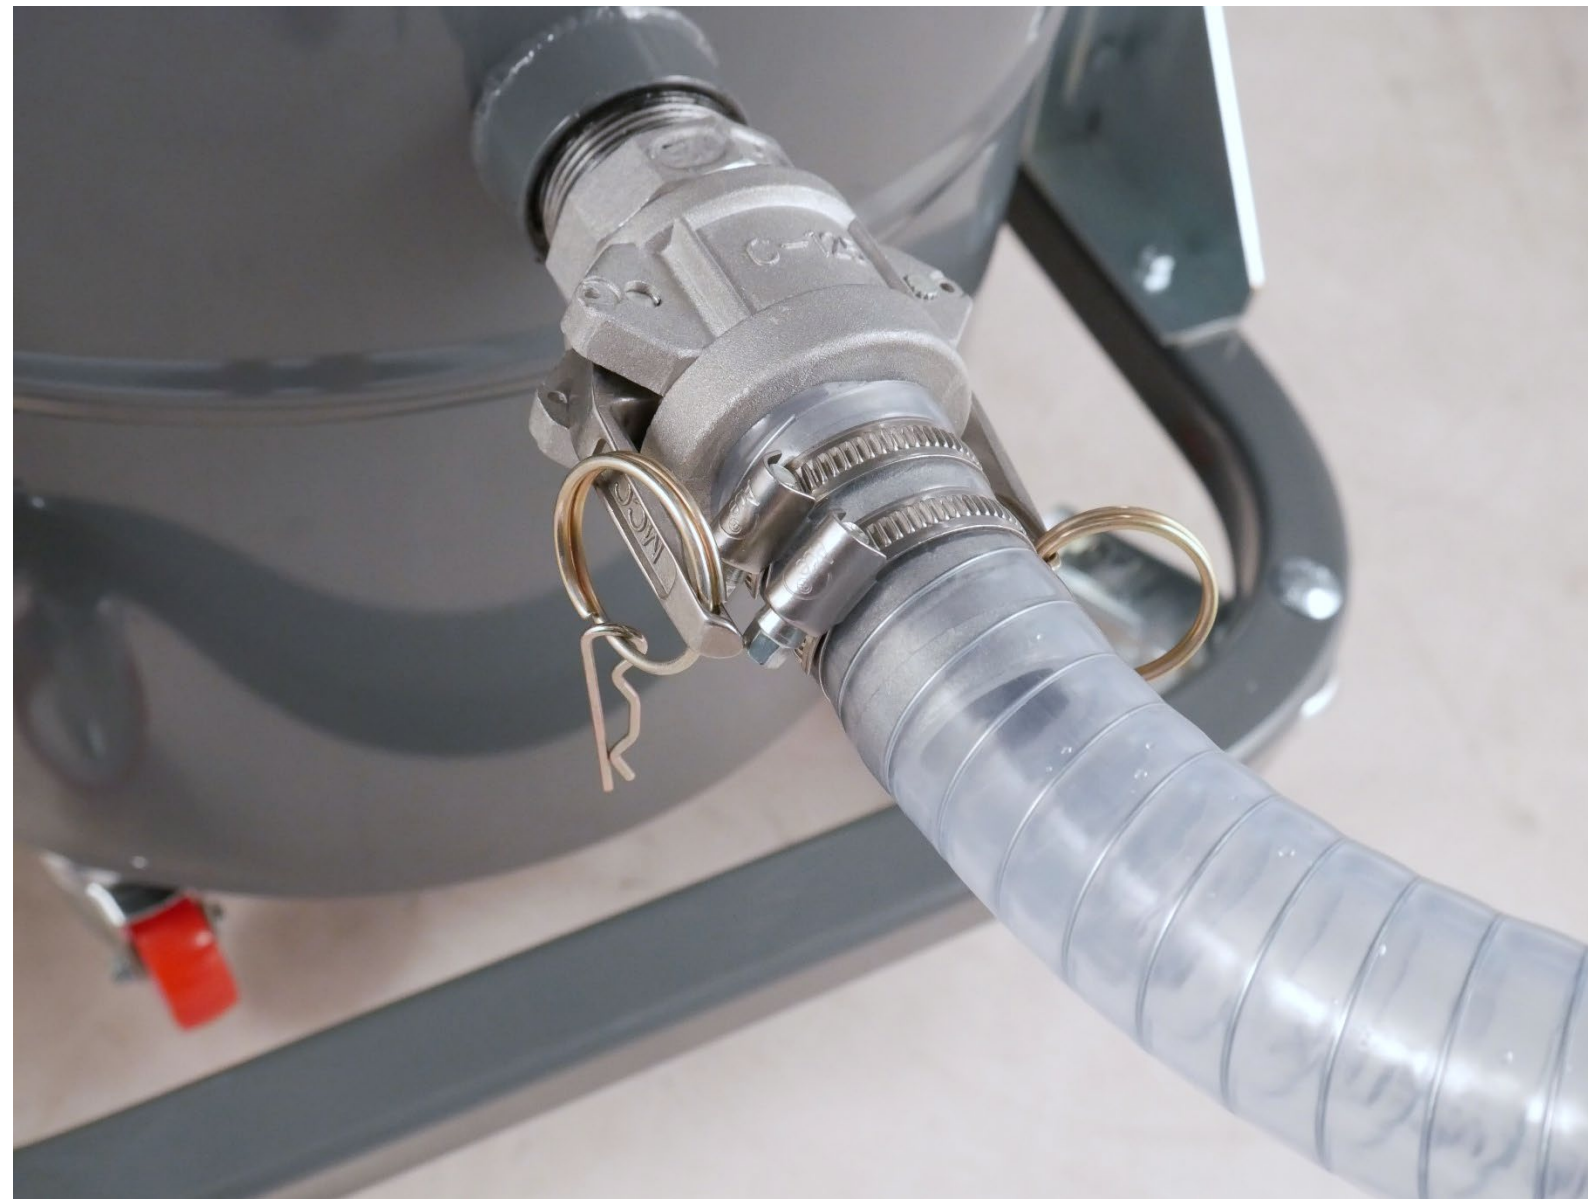

# CAMLOCK CONNECTION

MODELS 100MPI, 220MPI

Better sealing for liquid discharge

Easy to detach

# SUBMERSIBLE PUMP

MODELS 100MPI, 220MPI

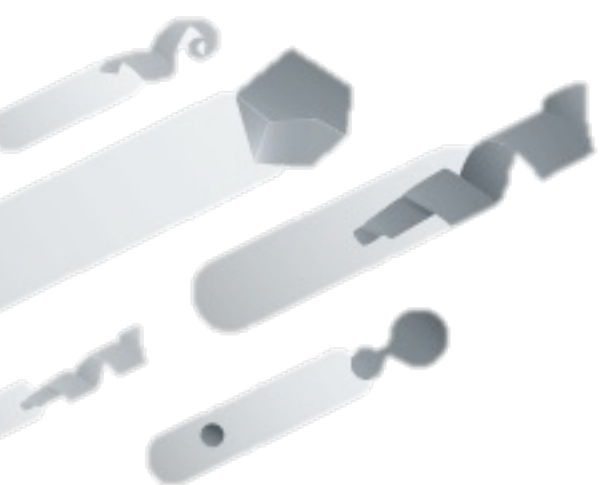

Discharge pump 140 lt/min

Automatic discharge  
maximum level is detected by a level  
sensor

NB: liquid discharge can be activated manually

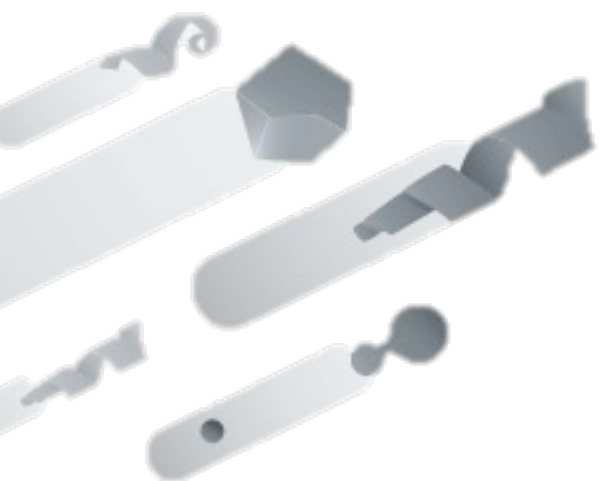

# POLYPROPYLENE FILTER

MODELS 100MPI, 220MPI, 220IF

300 micron filtration

# INSPECTION DOOR

MODELS 220MPI, 220IF

Stainless steel inspection door in order to check and facilitate cleaning operations inside the tank
